SUMMARY

Computer Science graduate (B.Tech, 2026) who builds AI applications in Python. Built and launched Jruva, a live AI assistant that answers questions from uploaded documents using RAG and multiple LLM providers. I build with AI coding tools and I am strengthening my fundamentals in machine learning, deep learning and LLM evaluation.

EDUCATION

B.Tech, Computer Science and Engineering - MES College of Engineering, Kuttippuram, Kerala **2022 - 2026**

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, HTML, CSS

AI and LLMs: RAG, embeddings, vector search (Qdrant), BM25 keyword search, LLM APIs (Gemini, Groq, OpenRouter), scikit-learn, pandas, NumPy

Backend and tools: FastAPI, Pydantic, REST APIs, PostgreSQL, Next.js, React, Git, GitHub Actions, Docker, pytest

Currently learning: XGBoost, PyTorch, transformers, LLM evaluation

PROJECTS

Jruva - AI Assistant for Document Q&A **2026**

Live public beta: jruva.in | Source private; walkthrough available on request

- Built and launched a public-beta AI assistant with a FastAPI backend and a Next.js / TypeScript frontend. Users can chat, upload documents and ask questions about them, with streamed answers.
- Answers document questions with RAG: document text is split into chunks, embedded with BGE-small and searched in Qdrant, combined with BM25 keyword search.
- Sends requests to Gemini, Groq or OpenRouter, and falls back to another provider when one fails, so the assistant keeps answering.
- Set up GitHub Actions to run linting, backend tests and a TypeScript build on every change.
- The launch post on LinkedIn reached 15,000+ impressions and 40+ comments from people testing the beta.

ACHIEVEMENTS

NASA Space Apps Challenge 2024 - Global Nominee and People's Choice **2024**

- Website developer in the six-member Team DarkNova for "Galactic Games: Fun in a Microgravity Environment"; built the site with HTML, CSS, JavaScript and Three.js 3D models.

CodeTrek 24-hour Hackathon, MES College of Engineering - 3rd Place **2025**

- Team DarkNova; built a working prototype within 24 hours.
